

Personal data

Name Peggy GUNKEL-GRILLON
 Born January 7th 1972 in Mulhouse, France
 Nationality French

Education

2015 Ability to conduct researches, University of New-Caledonia, Nouméa, New-Caledonia
 2001 PhD in chemistry, University of Haute-Alsace, Mulhouse, France

Current Position

Assistant professor at the University of New-Caledonia
 Deputy Director of ISEA laboratory (Institut des Sciences Exactes et Appliquées, EA 7484)
 BP R4-98851 Nouméa Cedex, New-Caledonia
 Tel : +687 290 327
 Email : peggy.gunkel-grillon@univ-nc.nc

Previous academic positions

2003-2007 Temporary teacher and researcher at the University of Geneva, Analytical and Biophysical Environmental Chemistry Group (CABE) <http://www.unige.ch/cabe/>
 2001-2003 Temporary teacher and researcher at the University of Haute-Alsace, Mulhouse, France, Gestion des Risques et Environnement laboratory (GRE) <http://www.gre.uha.fr/>

Current teaching activities

Courses, TD and TP on analytical chemistry, inorganic chemistry, aqueous chemistry and electrochemistry and on atomistic

Current research activities

Key words Environmental chemistry, analytical chemistry, metal speciation, and electrochemistry
My research Metallic elements are naturally present in our environment, but their biogeochemical cycles are disturbed by human activities. Their high reactivity is responsible for the great diversity of chemical forms they may be under. Their mobility and toxicity are closely related to their chemical form. In order to assess their risk of transfer to the abiotic or biotic compartments of the environment, it is essential both to determine the chemical forms under which they are found and to identify the associated environmental factors. My work then aims to meet the needs of knowledge on the behavior of metals for a modern society concerned with sustainable development.

Grants support since 2008

Sponsor	PIURN research Grant
Role	Co-investigator (Principal investigator: Pr Francis Manni)
Project period	2018-2020
Title	« Air Pollution in Pacific Island cities: PM2.5 measurements, its elemental composition and bio-monitoring
Total costs	€ 25, 000
Sponsor	CNRT Nickel and its environment.
Role	Co-investigator (Principal investigator: Dr Agnès Feurtet-Mazel)
Project period	2015-2018
Title	« Dispersion des Métaux de la Mine au Lagon (DMML)» http://www.cnrt.nc/dmml/
Total costs	€290,000
Sponsor	CNRT Nickel and its environment
Role	Collaboration (Investigator: Farid Juillot)

- Project period 2015-2018
 Title « DYNAmique des métaux de la MINE au lagon (DYNAMINE)», <http://www.cnrt.nc/dynamine/>
 Total costs €185,000
- Sponsor ANR MATETPRO Ecocorail
 Role Collaboration (Investigator: Marc Jeannin)
 Project period 2014-2018
 Title « Procédé physico-chimique pour la synthèse de matériaux marins durables pour la préservation du littoral », <http://www.agence-nationale-recherche.fr/Projet-ANR-13-RMNP-0004>
 Total costs €1, 000,000
- Sponsor CNRT Nickel and its environment
 Role Collaboration (Investigators: Bice Fubini & Christine Laporte-Magoni)
 Project period 2015-2017
 Title « Amiante et Bonnes Pratiques », <http://www.cnrt.nc/abp/>
 Total costs €124,000
- Sponsor French overseas ministry
 Role Collaboration (Investigator: Arnaud Serres)
 Project period 2014-2015
 Title Formation Electrochimique d'un Conglomérat Calcaire pour la réhabilitation des littoraux dans le Pacifique ; tests in situ à Wallis et Futuna (FECC)
 Total costs €42,000
- Sponsor South Pacific funding (n°SPP: 83-1-2013)
 Role Collaboration (Investigator: Arnaud Serres)
 Project period 2013-2014
 Title Lutte contre l'érosion des zones littorales du Pacifique par une méthode originale d'électrodéposition (LITTOFORT)
 Total costs €20,000
- Sponsor French overseas ministry
 Role Co-Investigator (Principal investigator: Vincent Lignier)
 Project period 2013-2014
 Title Nautilus Death Cave, « Etude paléontologique, hydro-géologique et paléo-climatique des profondeurs du Karst de Lifou, Nouvelle-Calédonie)
 Total costs €35,000
- Sponsor Industrial funding, XSTRATA
 Role Collaboration (Investigator: Christine Laporte-Magoni)
 Project period 2012-2014
 Title Evolution temporelle des propriétés physico-chimiques et structurales des minéraux asbestiformes du massif du Koniambo. Vers une meilleure évaluation du risque.
 Total costs €55,000
- Sponsor French overseas ministry
 Role Collaboration (Investigator: Christine Laporte-Magoni)
 Project period 2012-2014
 Title Caractérisation des transferts chimiques et des propriétés physiques et physico-chimiques des Minéraux Asbestiformes de la Nouvelle Calédonie. Vers une meilleure évaluation du risque sanitaire lié à l'amiante environnemental (projet CMA-NC)
 Total costs €15,000

Sponsor	French overseas ministry
Role	Investigator
Project period	2011-2013
Title	« Étude des lisiers des élevages porcins » (ELEP)
Total costs	€30,000
Sponsor	CNRT Nickel and its environment
Role	Collaboration (Investigators: Hamid Amir&Laurent l’Huillier)
Project period	2010-2013
Title	« Caractérisation et fonctionnement du système sol/plante/microorganismes dans les maquis miniers. Perspectives d’application à la restauration écologique » (ECOMINE-BIOTOP) http://www.cnrt.nc/ecomine-biotop/
Total costs	€470,000
Sponsor	CNRT Nickel and its environment
Role	Collaboration (Investigator: Dominique Cluzel)
Project period	2011-2014
Title	« Fonctionnement de petits bassins versants miniers » (FPBVM) http://www.cnrt.nc/fpbvm/

Thesis supervised

- *Cassandre Certain (2018-2021) : « Effet de la salinité sur la productivité et la valeur nutritionnelle de plantes halophytes indigènes destinées à l’alimentation humaine et aquacole »*
- *Jordan Prévot (2016- 2019) : « Formation d’un agglomérat scorie-dépôt calcomagnésien en vue de la valorisation de la scorie issue de l’extraction pyrométallurgique du nickel »*
- *Jasmine Pétrigliéri (2014-2017): “Alteration of asbestiform minerals under sub-tropical climate: mineralogical monitoring and geochemistry. The example of New Caledonia.”*
- *Charlotte Carré (2014-2017) : « Utilisation du dépôt calcomagnésien comme outil de décontamination de l’eau de mer »*
- *Camille Pasquet (2013-2016) : « Evaluation de la biodisponibilité du nickel, cobalt et manganèse dans les poussières de sols ultramaïques et développement d’un outil de bioindication lichénique des poussières émises par les activités minières en Nouvelle-Calédonie »*
